# WHATSAPP BUSINESS API?

**WhatsApp Business API** is an advanced communication solution designed for businesses to connect with customers on WhatsApp in a professional and automated way.

It allows businesses to send **notifications, OTP messages, marketing campaigns, order updates, and customer support** replies at scale through automation, chatbots, and integrations.

Unlike the regular WhatsApp or WhatsApp Business App, the **API version is designed for business automation, CRM integration, and bulk messaging systems.**

# TYPES OF WHATSAPP API

**Official WhatsApp Business API**

Verified business messaging through Meta platform.

**Non-Official WhatsApp API**

QR scan based WhatsApp automation panel.

# OFFICIAL WHATSAPP BUSINESS API

**Official WhatsApp API** is provided through **Meta (Facebook)** approved WhatsApp Business Solution Providers.

In this system, messages are sent using your approved business **Profile Name**, which increases customer trust and message engagement.

# KEY FEATURES

## OFFICIAL WHATSAPP BUSINESS API

- Messages sent from approved business display name
- Unlimited messaging capability
- No number blocking risk
- Supports chatbots and automation
- Bulk campaign messaging (template based)
- Multi-agent live chat support
- CRM and software integration
- OTP and verification messages
- Blue Tick verification (optional for eligible brands)

# Documents Required for Official WhatsApp API

To apply for Official WhatsApp API, the following documents are generally required:

- Business Name
- Business Website
- Business Email Address
- Facebook Business Manager Account
- GST Certificate / Business Registration
- Business Address Details
- Mobile Number for WhatsApp API

**Once these documents are submitted, the business profile is verified by Meta.**

# How to Get Official WhatsApp API

(Step-by-Step Process)

**1**

## STEP 1

Create or verify your Facebook Business Manager account

**2**

## STEP 2

Submit your business details and documents

**3**

## STEP 3

Choose a WhatsApp Business Solution Provider

**4**

## STEP 4

Get your WhatsApp number approved

**5**

## STEP 5

Create message templates for campaigns

**6**

## STEP 6

Start sending messages through API or software panel

**Approval usually takes 1–3 working days depending on verification.**

# UNOFFICIAL WHATSAPP BUSINESS API

**Non-official WhatsApp API works through WhatsApp Web automation software.**

In this method, the user needs to scan their WhatsApp number using QR code, and the system sends messages directly from the scanned number.

# KEY FEATURES

## UNOFFICIAL WHATSAPP BUSINESS API

- Bulk WhatsApp messaging
- Contact number import
- Auto reply system
- Basic chatbot
- Message scheduling
- Group messaging
- Integrating with CRM & Websites

# LIMITATIONS

- Messages are sent from the same scanned number
- Bulk messaging may cause number blocking risk
- Not officially approved by Meta
